### EXAMINER'S AMENDMENT

1. The After Final Amendment of August 17, 2006 has been entered.
2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Roger Parkhurst on August 28, 2006.

The application has been amended as follows:

In claim 1, line 9 of the claim, after "combustible" inserted --- impermeable ---.

In claim 1, line 9 of the claim, after "layer" inserted --- , which is combustible at a temperature less than about 700°C, ---.

In claim 14, line 2 of the claim, deleted "of at least" and inserted --- less than ---.

The following is an examiner's statement of reasons for allowance:

The above amendment establishes a maximum temperature at which the combustible impermeable layer is combustible. This further defines and thus overcome the 35 USC 112, second paragraph rejections with regard to the term "combustible". This amendment is supported by applicant's disclosure since it provides examples of

materials with combustion temperatures below the thermal process temperature range can be used.

Additionally, the prior art neither teaches nor discloses a ceramic honeycomb not loaded with catalyst having the claimed impermeable combustible layer at an edge of a holding material and between the ceramic honeycomb and its metal case.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
